

BALJINDER SINGH

Frontend Software Engineer | React.js | TypeScript | Dynamic UI Platforms
baljinder9219@gmail.com | +91 9780796694 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Frontend Software Engineer with nearly 4 years of experience building enterprise-grade **React and TypeScript** applications. Strong ownership in **dynamic UI platforms, configurable form/layout builders, JSON-driven workflow engines**, reusable frontend libraries, and **performance optimization**.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript, TypeScript, React.js, Next.js, Node.js, Express.js | **State Management:** Redux, Redux Saga | **UI & Styling:** Tailwind CSS, Kendo React, Responsive UI, Dynamic Forms, Drag-and-Drop UI | **Architecture & Tooling:** Micro Frontend, Nx Monorepo, Shared Libraries, Vite, Service Worker Caching | **Tools:** Git, GitHub, Jira, Azure DevOps

EXPERIENCE

Veersa Technologies | Senior Software Developer *Sep 2023 - Present*

Tech Stack: React.js, TypeScript, Redux, Redux Saga, Tailwind CSS, Kendo React, Vite, Nx, Micro Frontend

- **Owned and delivered** core CRM configuration modules including **Entity Manager** and **Layout Builder**, powering **dynamic data-driven UI**, backend-aligned entity schemas, form configuration, and data presentation.
- Built **Layout Builder** with complex **drag-and-drop** capabilities for configuring forms, field placement, **related entities**, relationships, **table views**, and display rules.
- Developed **Entity Manager** to create **dynamic business entities**, fields, relationships, and backend-aligned data structures through a scalable **React and TypeScript** interface.
- Developed **Form Renderer** and **Entity Search** flows to render Layout Builder **JSON configurations** as usable forms and searchable entity data views.
- Designed the **core frontend engine** for a **JSON-driven Workflow** module, supporting dynamic workflow rendering, **step propagation**, and task-based execution flows.
- Contributed to an **Nx-based micro-frontend architecture** with **admin and agent portals**, supported by **shared UI, API, and Redux store libraries**.
- Improved **frontend performance** with **code splitting, lazy loading**, React optimization practices, and **service worker caching**; **reduced repeated API calls from 120 to 55**.
- **Mentored interns and junior developers** while contributing to **architecture decisions**, strategic planning, and implementation approach reviews.

Byju's Exam Prep | Software Engineer *Jun 2022 - Aug 2023*

Tech Stack: React.js, JavaScript, GraphQL, Redux, Google Tag Manager, CleverTap

- Built a **React and GraphQL-based Progressive Web App** from scratch for faculty doubt-solving operations, without relying on create-react-app.
- Developed **scholarship creation flow** and **reusable frontend functionality** to improve maintainability, reduce repeated effort, and support faster feature delivery.
- Implemented **Google Tag Manager** and **CleverTap** tracking across key flows, improving analytics visibility and user journey tracking.

Byju's Exam Prep | Software Engineer Intern *Aug 2021 - Jun 2022*

- Transformed **batch listing** and **batch creation flows** with modern UI, **pagination**, and streamlined internal user workflows.
- Integrated **CD-GO APIs** for a release management product and collaborated on **frontend features**, debugging, and production-ready implementation.

PROJECT

Queueless | Frontend Project

Tech Stack: React.js, JavaScript/TypeScript, Responsive UI

- Built **Queueless** as a user-friendly frontend project focused on improving **queue management** and reducing manual waiting through a clean digital flow.
- Designed **responsive screens, reusable UI components, form handling**, and clean component organization to make the application easier to extend.

EDUCATION

Chitkara University | **Bachelor of Engineering in Computer Science** *2018 - 2022* CGPA: 9.28

St. Mary's School | **Senior Secondary Education** *2017 - 2018*
